

## Less-Toxic Product List

### Purpose

This product list is intended to **help stores** participating in the *Our Water, Our World* program to stock less-toxic products that are compatible with Integrated Pest Management (IPM). The list is also intended to **help consumers** identify products that will help them manage pests with minimum risk to themselves, their family, pets, and environment. IPM encourages the use of non-toxic and less-toxic pest control, and emphasizes pest prevention and management rather than attempting to eradicate pest populations with broad-spectrum chemical pesticides.

### Range of products / Disclaimers

The product list does not include all less-toxic product types or active ingredients – only those most commonly available to, or used by, consumers for pest prevention and less-toxic pest control. Although water pollution prevention agencies that sponsor the program update the list annually, the trade names given for each product or formulation are intended as examples only. Different products with the exact same active ingredients may be equally suitable. No endorsement of specific brand name products is intended, nor is criticism implied of similar products that are not mentioned.

The product label lists the target pest for each product. This means that the product is registered for use against that specific pest. As with all products on the market, listing on the label is not a guarantee that the product will be effective against that pest under all circumstances, or that the product is the best choice for managing that pest.

### Pesticide use and disposal

Use suggested products according to label directions and dispose of unwanted or leftover pesticides at a household hazardous waste collection facility or event. For more information on pesticide disposal, call 1-800-CLEANUP, or visit: [www.1800CLEANUP.org](http://www.1800CLEANUP.org), or the disposal section of the *Our Water, Our World* website: [www.ourwaterourworld.org](http://www.ourwaterourworld.org).

If you have any questions about the safety, environmental impact, or proper use of a pesticide, call the National Pesticide Information Center 24-hour hotline at (800) 858-PEST, or visit: [www.npic.orst.edu](http://www.npic.orst.edu).

### More information

Detailed information about using IPM and less-toxic pest management is available in the “Less-Toxic Pest Management” Fact Sheet series developed by the *Our Water, Our World* program and in the references on the last page of each Fact Sheet. The fact sheets as well as other information about the *Our Water, Our World* program are available at: [www.ourwaterourworld.org](http://www.ourwaterourworld.org). The website can also be used to request information on pests that are not part of the current fact sheet series.

## Less-Toxic Product List

Less-toxic products for managing each of the following pests  
can be found starting on page...

Algae.....	3
Anthracnose .....	3
Ants.....	3
Aphids.....	5
